

PRESSEINFORMATION

TACHOfresh exhibits at the LogiMAT

Wildau - Germany, 15.01.2024 - TACHOfresh, provider of intelligent solutions for digital tachographs, will be exhibiting at LogiMAT, the international trade fair for intralogistics solutions and process management in Stuttgart from March 19 to 21, 2024

Over the three days of the trade fair, TACHOfresh's presentation will centre on digital tachograph solutions with a focus on remote download, archiving and reporting. LogiMat is an excellent opportunity for TACHOfresh to present its own remote download solution for digital tachograph data to decision-makers from transport and logistics companies.

"As an international trade fair for intralogistics solutions and process management, LogiMat offers us an ideal opportunity to inspire a large audience with our fully automated remote download solution. We are particularly looking forward to presenting our new card hotel for company cards, the MINI Star 2," says TACHOfresh Managing Director Dr Susanne Kirsch. "The MINI Star 2 is an important new centrepiece for our fully automated remote download process of tachograph mass memory data - especially for small and medium-sized transport companies, whose readout processes are still often carried out manually."

"The effects of Mobility Package 1 and the new Smart Tacho Version 2 have once again raised requirements on the industry. TACHOfresh offers solutions for these additional demands. It is web-based, modular and cost-effective. Over 40,000 vehicles and 100,000 drivers in Europe are already using our services," explains Kirsch. The TACHOfresh range of services also includes full integration of Smart Tacho Version 2 and the option of either having the company card hosted by one of the TACHOfresh partners or keeping it local, in a card hotel at company site.

TACHOfresh will be exhibiting in Hall 2 (East Entrance) at the joint stand of "Your German Logistics", Stand ES60.

About TACHOfresh

TACHOfresh, based in Wildau near Berlin, has been developing solutions for the transport and logistics industry for 30 years. The company cooperates closely with the Technical University of Wildau. With the first digital tachographs in 2006, TACHOfresh undertook a strategic reorientation. Our mission is to be the partner expert for remote download and tachograph data reporting in Europe. Today, TACHOfresh serves over 3,000 customers with 100,000 drivers and 40,000 vehicles across Europe. TACHOfresh is located in Wildau/Berlin and Munich.
